Weight concentration by generated composition motif; training-domain classes unavailable
Effective number of branches
Maximum branch weight
Top-three cumulative weight
C-H motifs
C-H-N-O motifs
C-H-N-O-S-P motifs
transition-metal oxides
mixed-metal oxides
silicate/oxide motifs
transition-metal chalcogenides
binary refractory alloys
ternary refractory alloys
multicomponent alloys
semiconductor motifs
ionic/halide motifs
rare-earth oxides
